

Establishing Order in the New World

You have just landed in the New World from England and you have been appointed the task of creating an organized colony. This must include:

- **Duties and Responsibilities**
- **Rules**
- **Laws and Policies**
- **Consequences of Breaking the New Laws**

These are the facts and no other information is given:

- There are 30 other people- men, women, and children
- You do not know any of these people personally.
- The climate is like Georgia and it is June
- The local vegetation has fruit, nuts, and seeds.
- There are some wild animals.
- The only clothes you have are the clothes on your back.

Remember: What sort of things must happen in a new place. What do you have to have in order to survive? The most important thing you can do is maintain some type of order and exact procedures. You are essentially creating a government that should be able to function.

Things that must be included:

- The name of your colony.
- What type of government you will have and a description of that government.
- At least 8 Laws of your colony and the consequences for breaking these laws.
- The Duties and Responsibilities of the people. (How will you survive?)
